

### About SOPHiA GENETICS™

At SOPHiA GENETICS, we have developed an AI platform that analyzes complex multimodal data (including genomics, radiomics, clinical, biological, and digital pathology data) and enables clinicians to generate actionable insights for patients with cancer or rare diseases. Hospitals, academic centers, and central laboratories across the globe choose our platform due its accuracy, expedited turnaround times, workflow automation, cost savings, and decentralized approach.

With a footprint spanning 70+ countries and 800+ healthcare institutions, our cloud-native platform empowers the largest network of connected healthcare professionals in the world. The AI powering our platform learns from diverse, real-world data computed over time and from the inputs provided by our community of users to create a collective intelligence that delivers life-saving insights and sparks groundbreaking research breakthroughs. Beyond the clinical market, our platform provides significant value to our BioPharma partners in the area of AI-powered drug discovery, development, and deployment.

By harnessing the power of AI and our collective intelligence, we are expanding access to data-driven medicine and enabling the patients of today to help the patients of tomorrow.

### Our Vision

Our vision is to build a future in which each patient has equal access to world-class care.

## About the SOPHiA DDM™ Platform

SOPHiA GENETICS is the creator of SOPHiA DDM™, a cloud-based platform capable of analyzing data and generating insights from complex multimodal data sets and different modalities. The SOPHiA DDM™ platform enables healthcare institutions to get quick, robust insights from their data. We apply our technology to areas such as cancer and inherited disorders, where combining genomic and phenotypic information is vital to support research and drug development efforts.

Benefits for all

SOPHiA GENETICS' data-sharing methodology also helps researchers and healthcare professionals work together as a community by sharing and leveraging patterns identified via artificial intelligence and machine learning. Our universal platform is designed to improve as we analyze more data over time.

The SOPHiA DDM™ platform is one of the largest technology-agnostic networks of connected healthcare institutions worldwide and is currently **used by more than 800 hospital, laboratory, and biopharma institutions globally<sup>1</sup>.**
